DAUPHIN ISLAND AUDUBON BIRD SANCTUARY TRAIL SYSTEM

Lake Loop Trail	0.6 Miles
Campground Trail	0.4 Miles
Dune Edge Trail	0.3 Miles
Swamp Overlook Trail	0.8 Miles
Upper Woodlands Trail	1.7 Miles
To Fort Gaines	0.5 Miles

Entire trail system is approximately 4.3 miles including walk to Fort Gaines.

Lake Loop Trail (Handicapped Access)

The Trail takes the visitor through the maritime forest, where the dominant plants are Loblolly and Slash Pines, Live Oak, Southern Magnolia and Tupelo Gum. It leads by slightly elevated boardwalk from the parking lot to Gaillard Lake, where turtles, an occasional alligator and wading birds can be seen. Those wanting to go further can cross the Dune Edge Trail at the southern western corner of the lake and cross a boardwalk to the beach.

Campground Trails

These trails start at the campground and visitors can enter the Sanctuary through a pedestrian only entrance. One trail joins at the Lake Loop Trail. While the other ends at a pavilion on the beach. Once visitors make their way to the beach they can then walk along the shoreline of the Gulf of Mexico to visit historic Fort Gaines.

Dune Edge Trail

This trail follows the beach meadow which is behind the primary dune and is made up of a variety of flowering weeds, grasses and woody plants. This trail runs from the Swamp Overlook along the primary dune and passes by the southern end of Gaillard Lake.

Swamp OverlookTrail

This is a short trail leading from the Banding Area to an overlook at the Swamp. Sometimes the Swamp may be dry due to the climate. This is a great spot for viewing wintering woodland species.

Upper Woodland Trail

The Upper Woodland Trail starts at the north-west corner of the Lake Loop Trail and follows the firebreak along a wide path. It then bears left (South) from the firebreak and meanders through a pine forest, interspersed with Magnolia, Wax Myrtle and Yaupon. It rejoins the southern most firebreak and returns to the Lake Loop Trail at the southern end of Gaillard Lake.

Birding on the Island

Dauphin Island has been named one of the four top locations in North America for bird viewing. The Bird Sanctuary has been recognized by the National Audubon Society as being "Globally Important" for bird migrations. Birding on the Island is best during the migrations. The Spring migration is from the middle of March through the first part of May. The Fall migration typically runs from mid-September through October. During the Winter months visitors will be able to see some interesting waterfowl, wading birds and wintering woodland species.
